

## Instruction Manual for SignEtor:

### Installation:

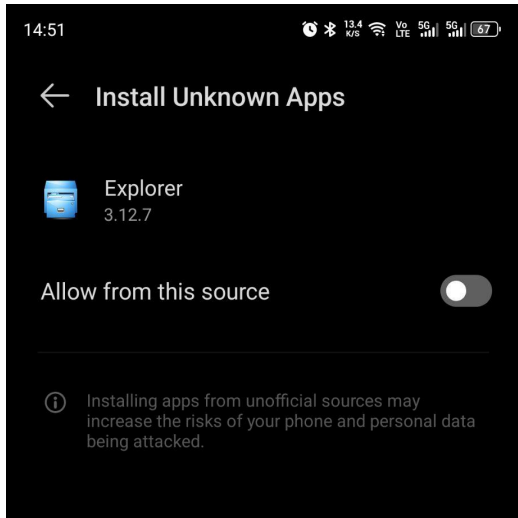

#### Download the APK File

- Open your phone's browser and download the APK file from the provided link or source.  
<https://github.com/RVTF15/SignEtor/releases/tag/main>
- If prompted to confirm the download, tap **“Download”** to proceed.

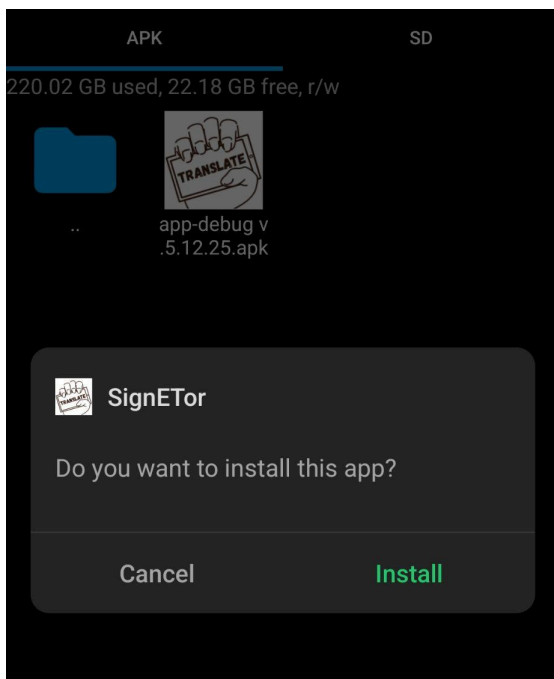

#### Allow App Installation from Unknown Sources

- After downloading, tap on the APK file from your browser's download list or from your **Downloads** folder.
- Your device may show a message saying **“For your security, your phone is not allowed to install unknown apps”**.
- Tap **“Settings”** or **“Allow”**, and toggle the switch to enable installation from this source. This allows the app to be installed since it's not from the Google Play Store.
- Return to the installation screen.

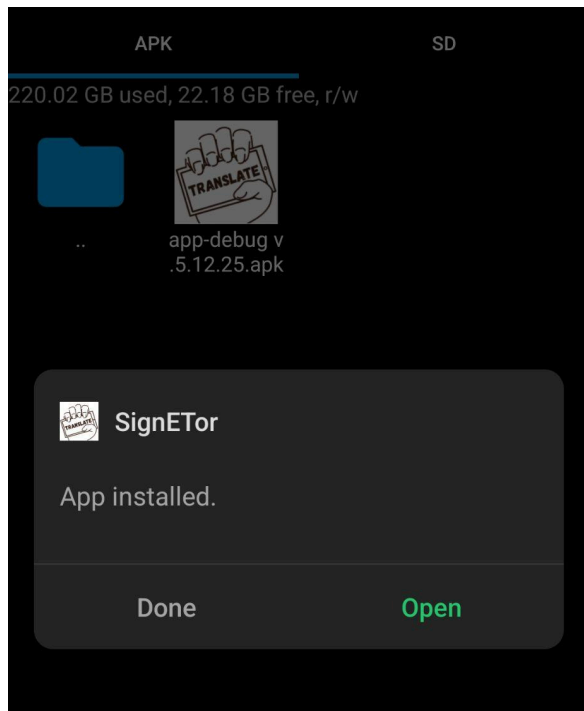

## Install the App

- Tap **“Install”**.
- Wait while your phone installs the app. This may take a few moments.
- Once completed, you’ll see a message saying **“App installed”**.

## Open the App

- Tap **“Open”** to launch the app immediately.
- Alternatively, you can find it later in your app drawer with the rest of your apps.

### Using the App for the First Time:

#### Grant Camera Permission

- When you open the app for the first time, it will ask for permission to access your camera.
- This is required for the app to detect your hand gestures.
- Tap **“Allow”** when prompted.

Don't allow

## Navigate the Main Interface

- You will now be on the app's main screen.
- Look for a brown arrow at the bottom of the screen.
- Swipe **upward** from that arrow to view usage instructions and helpful tips within the app.
- You are now at the main interface of the application, you can swipe up from the brown arrow at the bottom of the screen for instructions

## Using Hand Gestures

- Make sure you are in a **well-lit environment** so the camera can clearly see your hand.
- The app will display a **skeleton overlay** of your hand on the screen. This helps you see how the app is interpreting your hand movements in real time.
- At the **bottom left corner** of the screen, the app will show the **recognized gesture or action** it has detected from your hand.
